City Landscape Lighting Projects

Tower of Time

Project Location: Yantai, City Shandong Province 

Product: IP68 NEON 16X16MMDMX512

The lighting design for the Yantai Time Tower combines technology, art and cultural symbolism to reflect the city's maritime heritage and the fluidity of time. Energy efficient LED systems and intelligent controls enable dynamic colour transitions, rhythmic patterns and interactive displays that echo the tides and weather.

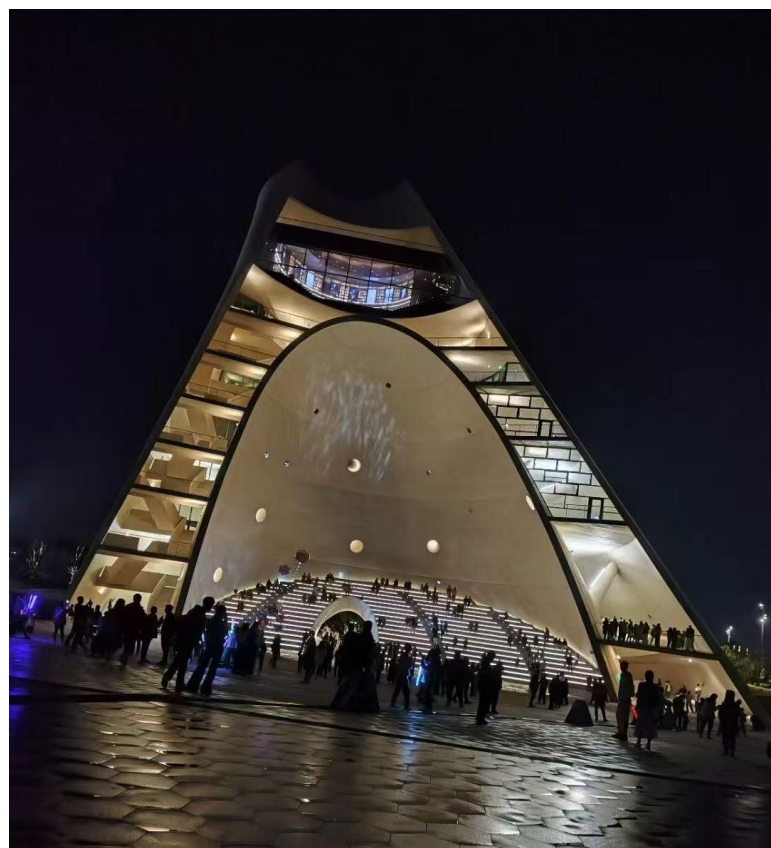

Tower of Time

Project Location: Yantai, City Shandong Province 

Product: IP68 NEON 16X16MMDMX512

Layered lighting highlights the parametric façade, emphasising its sculptural geometry. Warm and cool gradients evoke dawn-to-dusk transitions, while projections incorporate celestial patterns and local mythology. Sustainability drives solar-powered elements and adaptive dimming. Visitors are engaged through app-controlled light interactions, while seasonal themes enrich its role as a cultural icon. This innovative design transforms the urban nightscape

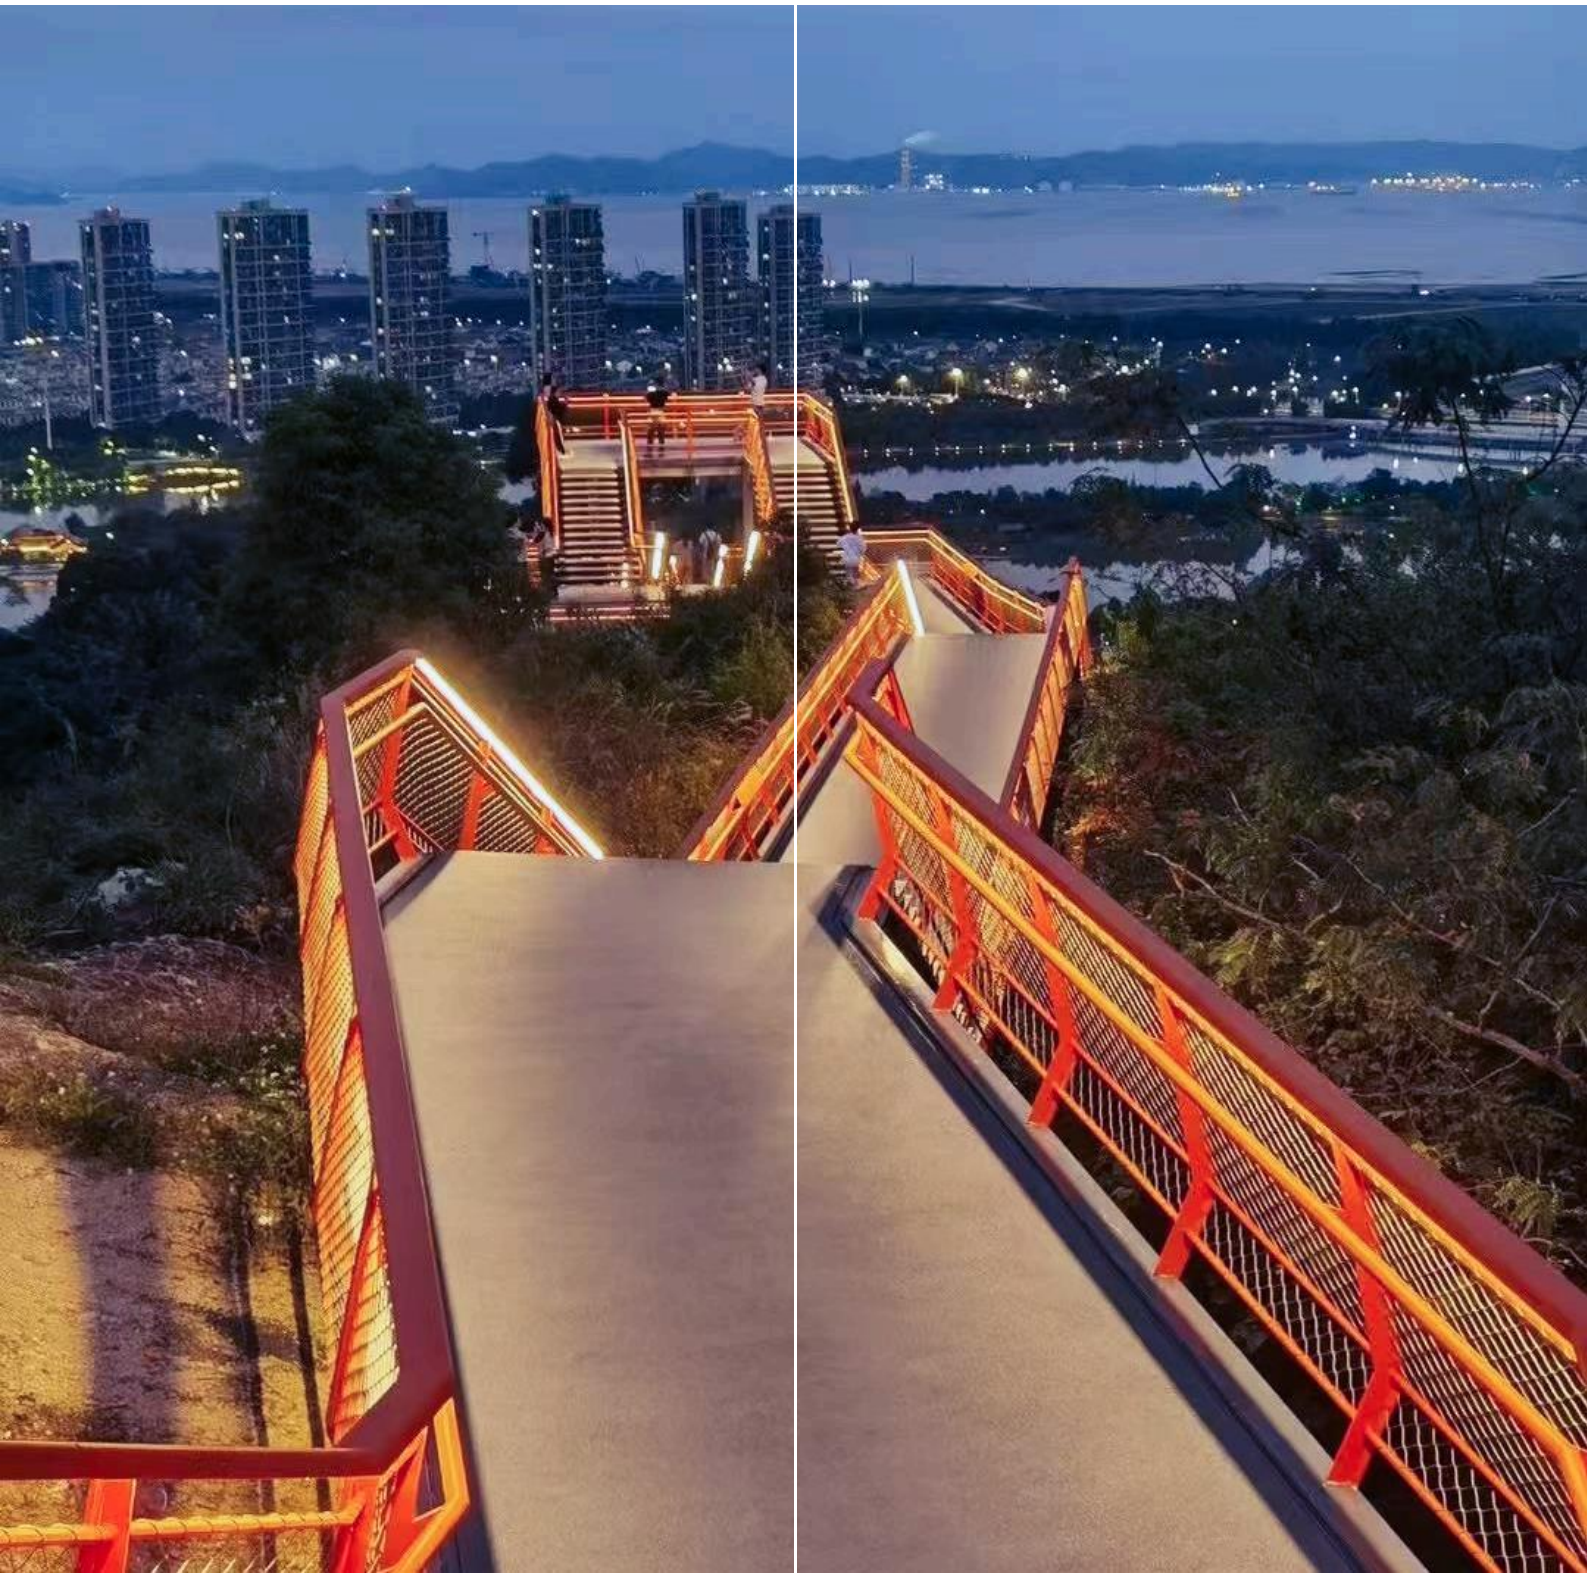

Hiking Trail

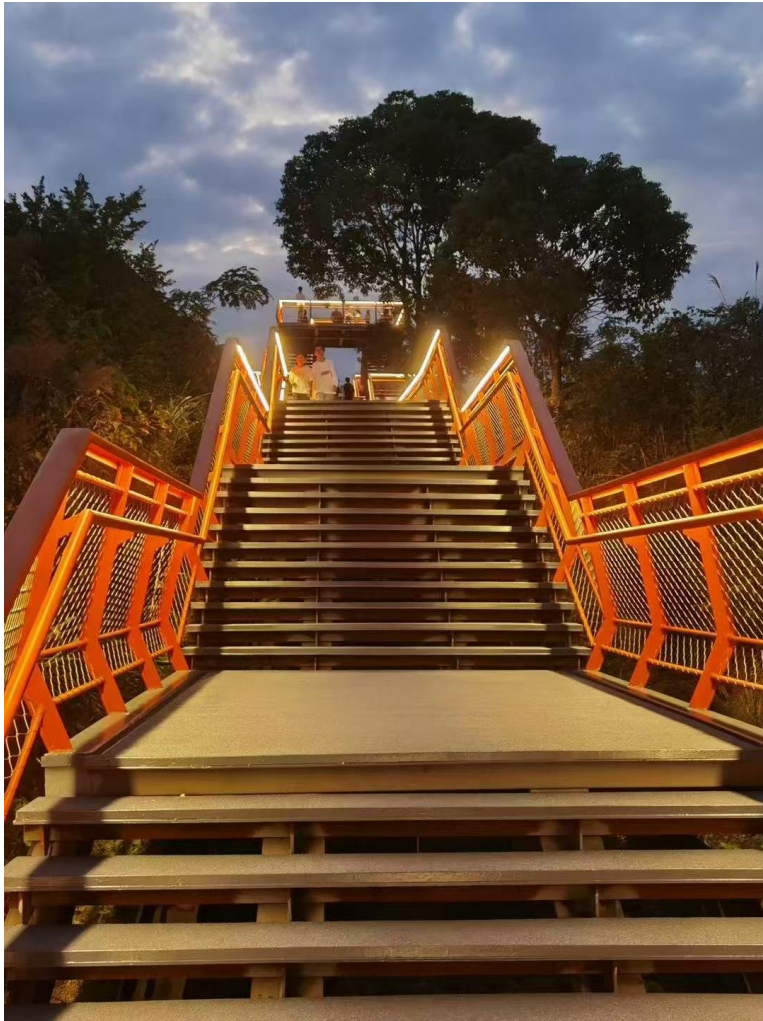

Location: Yandang Mountain, Wenzhou City, Zhejiang Province

Product: IP67 NEON 12X12MM

The lighting design for the Rak Ching Si Trail utilises LED low-power neon strips, combining sustainability with ethereal beauty. These flexible, energy-efficient strips outline the trail in a soft amber gradient, ensuring safety while minimising ecological impact. Neon highlights highlight ancient trees, rock textures and temple architecture, blending Buddhist symbolism with modern simplicity.

Hiking Trail

Location: Yandang Mountain, Wenzhou City, Zhengjiang Province

Product: IP67 NEON 12X12MM

Adaptive controls adjust brightness according to time of day and foot traffic, paired with a solar-powered system for zero-waste operation. Subtle projections of Zen motifs and seasonal hues enhance the spiritual ambience of the trail. The low glare and dynamic colour transitions of the neon strips harmonise with the nocturnal ecosystem of Yandang Mountain, creating a meditative journey that respects nature and heritage day and night.

InterContinental Shanghai Dishui Lake

Location: Shanghai

Products: IP20 2835 Flexible Strip 2400K, 2700K
IP67 Neon 10X10MM, 6X6MM

The lobby's lighting design reflects modern sophistication, blending organic fluidity with lakeside serenity. Linear LED strips trace architectural curves reminiscent of water ripples, while wall-washing fixtures highlight textured surfaces and art installations. Dynamic colour temperatures are adjusted via intelligent controls, transitioning from crisp daylight tones to warm twilight tones, in keeping with circadian rhythms.

Location: Shanghai

Energy efficient LEDs and solar responsive dimming reduce energy consumption by 40%. Recessed ambient lighting creates a warm and welcoming ambience and highlights the grandeur of the lobby's double-height ceiling. Sustainable materials and minimal light pollution underscore the hotel's eco-commitment. The design harmonises technology, nature and luxury, reflecting the serene and vibrant nature of Dripping Lake.

Chongming Island Retreat Hotel

Project Location: Shanghai

Products : IP20 IP65 2835 Flexible Strip Light
13X13MM Flexible Wall Washer Lights

Nestled in the tranquil ecosystem of Chongming Island, this eco-friendly log cabin B&B blends minimalist architecture with nature. The warm lighting design, with soft amber tones and multi-layered lighting, creates a cosy retreat. Carefully placed light fixtures highlight the texture of the natural wood while casting a soft glow in the living room, bedrooms and outdoor terrace.

Flexible Strip 10X10MM
8X8MM Neon
Diffused Modular Lights

Wyndham Grand Chengdu Lighting Design The design combines modernity with cultural elegance through recessed linear LEDs and adaptive ambient lighting. Energy-efficient light strips accentuate the curves of the building, while intelligent controls adjust the colour tones according to natural rhythms. Wall wash lights highlight local art and textures, reflecting the serenity of Chengdu.

Wyndham Grand Chengdu

Project Location: Chengdu

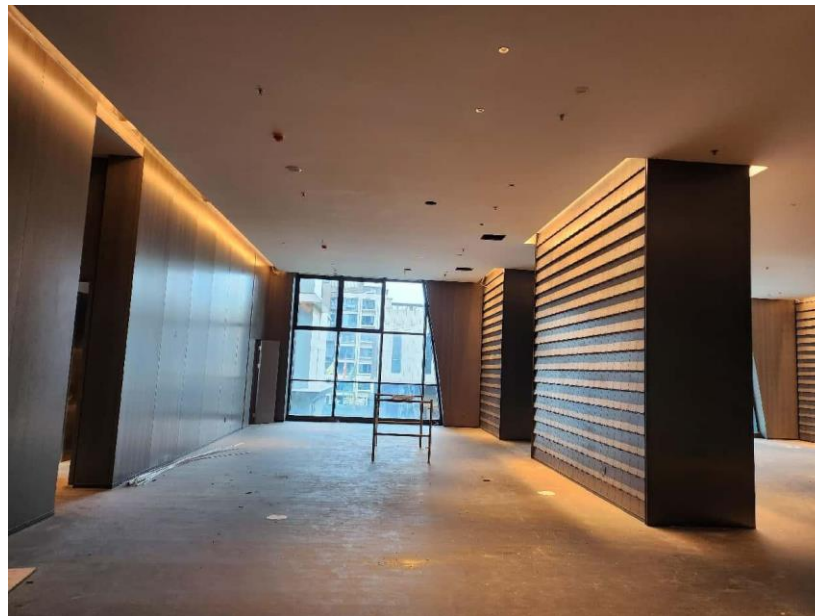

Intelligent dimming and colour temperature adjustment system realises the natural transition of light from day to night, and the use of low-energy design and environmentally friendly decorative materials highlights the hotel's green hospitality. The harmonious unity of technology, luxury and regional glamour is only for the ultimate experience of guests' comfort.

Disneyland park

Project Location: Shanghai

The Lakeside Shop at Shanghai Disneytown features a whimsical lighting scheme that combines waterfront charm with Disney magic using neon LED strips and flexible wash lights. The neon strips outline the building's curves and signage in a playful gradient of colours, evoking a retro vibe while accurately illuminating the pathway in an energy-efficient manner. Flexible wash lights bathe the façade in soft, dynamic tones, enhancing merchandise displays and reflecting the effect of the shimmering water feature. Intelligent controls synchronise the lights with music or seasonal events to create immersive storylines linked to Disney themes. Low-glare optics ensure comfort, while the all-weather design withstands the humidity of the lake.

Shenzhen Xili Zhiyan Office Building

Project Location: Shenzhen 

Products: IP44 50X30MM Linear Lights

Inspired by the Shenzhen metro line map, this project integrates the city's transport network into the lighting design of the office building. Unique linear lamps and lanterns outline the direction of the metro lines with smooth lines, and the lights run through the office space like a dynamic track, showing the vitality of Shenzhen city and creating a comfortable and efficient office environment through soft light, realising the clever fusion of function and art.

Pernod Ricard Boutique

RIDILUX®

Project Location: Dallar

Products: IP20 2835 Strip
16X16MM Neon strip

The warm light design of the Pernod Ricard boutique is crafted with precise colour temperature control and hierarchical lighting, so that the soft warm light flows like amber, outlining the outline of the wines and rendering a luxurious atmosphere. In the interplay of light and shadow, the shelves and displays shine, and the space's style leaps out, creating an immersive high-end wine-tasting experience for customers, and interpreting the perfect blend of lighting art and commercial aesthetics.

Pernod Ricard Boutique

Project Location: Daliar 

Pernod Ricard Boutique has sculpted a warm light system that is like a poetry of flowing light and shadow. Special soft light strips, in the form of liquid gold leaf, meander along the contours of the wine cabinets, weaving the starry reflections of the bottles into a dome of light. Accent spotlights, like moonlight sculptors, capture the amber colour of each vintage and the grain of the bottles, casting a hazy halo of light on the velvety walls.
